230651 - OVNET - Overlay Networks

Coordinating unit: 230 - ETSETB - Barcelona School of Telecommunications Engineering
Teaching unit: 744 - ENTEL - Department of Network Engineering
Academic year: 2017
Degree: MASTER'S DEGREE IN TELECOMMUNICATIONS ENGINEERING (Syllabus 2013). (Teaching unit Compulsory)
DEGREE IN TELECOMMUNICATIONS ENGINEERING (Syllabus 1992). (Teaching unit Optional)
MASTER'S DEGREE IN NETWORK ENGINEERING (Syllabus 2009). (Teaching unit Optional)
MASTER'S DEGREE IN INFORMATION AND COMMUNICATION TECHNOLOGIES (Syllabus 2009). (Teaching unit Optional)
ECTS credits: 5
Teaching languages: English

Teaching staff
Coordinator: OSCAR ESPARZA
Others: JOSÉ LUIS MUÑOZ, JUANJO ALINS, JORGE MATA

Prior skills
Skills to deal with Linux, networks and command line interface

Requirements
TCP/IP protocol suite
Firewall configuration
Linux networking

Degree competences to which the subject contributes

Specific:
1. Ability to deal with the convergence, interoperability and design of heterogeneous networks with local, access and core networks, as well as with service integration (telephony, data, television and interactive services).
2. Ability to design and dimension transport, broadcast and distribution networks for multimedia signals
3. Ability to model, design, implement, manage, operate, administrate and maintain networks, services and contents
4. Ability to plan networks and decision-making about services and applications taking into account: quality of service, operational and direct costs, implementation plan, supervision, security processes, scalability and maintenance. Ability to manage and assure the quality during the development process
5. Ability to understand and to know how to apply the functioning and organization of the Internet, new generation Internet technologies and protocols, component models, middleware and services

Transversal:
6. EFFECTIVE USE OF INFORMATION RESOURCES: Managing the acquisition, structuring, analysis and display of data and information in the chosen area of specialisation and critically assessing the results obtained.
7. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.
The aim of this course is to train students in the mechanisms and protocols needed to design and deploy overlay networks. We will introduce the basics of tunneling and multicast techniques, which are essential to the proper deployment of overlay-based multimedia services over the Internet. We will also introduce some example of overlays, like p2p (peer-to-peer), SIP (Session Initiation Protocol), CDN (Content Delivery Networks) and SDN (Software Defined Network).

Learning results of the subject:
- Ability to design and deploy overlay networks and more specifically, those that provide multimedia services over the Internet.
- Ability to use and analyze networks.
- Ability to understand the basic working of some existing overlay networks.

</table>
| 1. Introduction | 5h             | Theory classes: 2h  
Self study : 3h  
Introduction to the concept of overlay and underlaying network, kinds of networks and typical examples. |
| 2. p2p        | 16h            | Theory classes: 6h  
Self study : 10h  
| 3. IP tunnels  | 26h            | Theory classes: 2h  
Laboratory classes: 4h  
Self study : 20h  
Creation and management of IPIP tunnels. Problems and solutions of tunnels. |
| 4. Multicast  | 26h            | Theory classes: 2h  
Laboratory classes: 4h  
Self study : 20h  
| 5. SIP        | 30h            | Theory classes: 4h  
Laboratory classes: 4h  
Self study : 22h  
SIP signalling. SIP session management. SIP call with and without proxies. |
## 6. CDN

**Learning time:** 6h  
- Theory classes: 2h  
- Self study: 4h

**Description:**  
Architecture and types of CDN networks. Technological examples.

## 7. SDN

**Learning time:** 18h  
- Theory classes: 6h  
- Self study: 12h

**Description:**  
Architecture and technologies

### Qualification system

- Short answer quizzes: 60%
- Laboratory exam: 30%
- Attendance: 10%
Regulations for carrying out activities

Each chapter will be evaluated by a quiz. The laboratory exam will be practical (using the lab tools) and individual. Attendance is mandatory in lectures and lab sessions, and it will be controlled every class day.
